

BIOPULSAR REFLEXOGRAPH - Brief Guide

Important - Biopulsar Reflexograph system (including modules-total products & services) is a complementary supporting Tool for the Medical / Healthcare / Wellness Professionals. Use of Biopulsar-Reflexograph[®] system cannot & does not replace medical consultations with a qualified health or medical professional to meet health and medical needs. It cannot & is not meant to replace the skills, knowledge, care or treatment that only a qualified professional can provide. The use of our diagnosis systems and other modules does not offer any substitute for therapeutic training and does not confer any health care skills. We do not provide medical advice, and are not engaged in providing medical and professional services.

Overview

- ◆ Biopulsar-Reflexograph – State of the art technology and the latest in energetic diagnostic systems.
- ◆ The Biopulsar system has more sensors and measuring stations than any other aura system and most biofeedback devices, ensuring accuracy in data read.
- ◆ Specific organ analysis and presentation unique to the Biopulsar-Reflexograph. Reads 50 reflex zones thereby giving an instant and complete patient health report.
- ◆ Less expensive yet more detailed than most diagnostic biofeedback systems.
- ◆ Simple and fast to use. No waiting for results.
- ◆ Precision aura pictures corresponding to over 90% of the real subjective perceptible biofield of the human energetic system.
- ◆ **Unprecedented and explicit organ, colour and chakra biofeedback.**
- ◆ The Biopulsar displays real-time feedback that leads to instant solutions by offering the fastest way of understanding "cause and effect" and ultimately the "cure." It provide multi-dimensional and holistic approach into one's health.
- ◆ Scientific, holistic and unbiased formats revealing a variety of perspectives into a clients make-up.
- ◆ Proves the mind/body connection as well as spiritual aspects for in-depth counselling through several biofeedback capabilities exclusive to only the Biopulsar technology!
- ◆ Preventative medicine – Shows energetic weaknesses before they manifest into physical, mental or emotional symptoms.
- ◆ X-rays and other diagnostic systems are unable to show more than just physical symptoms However, the Biopulsar has the ability to **see these symptoms in the reflex zone analysis or in the colour attributes**. The Biopulsar can pinpoint underlying areas of concern that would normally be missed by standard methods of testing offering the practitioner **an integrated Eastern and Western approach**.
- ◆ The Biopulsar biofeedback capabilities allow you to view your client's body and mind responses to thoughts and remedies (such as foods, nutritional supplements, medicine, colour, etc.) for a complete analysis.

Lastly, the Biopulsar-Reflexograph establishes you as specialist in the area of bioenergetics giving your clients a complete health analysis of their mind, body & spirit for self-improvement and to keep them on the track of becoming or staying well (preventative medicine)!

Biopulsar-Reflexograph[®] - The Leader of New Energy Technology

- ◆ The Biopulsar-Reflexograph[®] not only expands your energy diagnostic capabilities allowing you to identify a wider range of existing and potential conditions, **it also improves patient communication, comprehension and case acceptance.**
- ◆ The Biopulsar-Reflexograph[®] allows any holistic practitioner to instantly see the body's **physical health and access the hidden and forgotten emotional and mental attributes—making the connection of the body, mind and spirit.**
- ◆ By gaining this type of feedback of the colour traits and correlating these energies to the whole of the person, the trained Biopulsar analyst can support any therapy.

- ◆ The Biopulsar has numerous uses in behavioral medicine and medical applications that unite the body and mind. The Biopulsar complements a variety of different disciplines / Health Practice such as –
 Medical, Holistic and Preventative Health Practitioners, Acupuncturists, Homeopaths, Ayurvedic Doctors, Naturopaths, Dentists, Psychologists, Hypnotherapists, Chiropractors, Physical Therapists, Nutritionists, Bio-energetic Researchers, Biofeedback Training, Scientists, Psychiatrists, Paranormal Investigators, **Mental Institutions, Hospitals, Cancer Clinics**, Healing Centres, Research Institutes, and **Drug and Rehabilitation Centres**.

Development

1. The development of the Biopulsar-Reflexograph is based on over 17 years experience with thousands of biofeedback measurements, together with aura photography and aura consultations.
2. For several years, the developer, Martina Gruber, worked with an international research team consisting of biofield researchers, therapists and sensitive life-energy investigators; many of whom attended esoteric and medical fairs and congresses worldwide, conducted biofeedback measurements and aura pictures on thousands of people and who evaluated these measurements.
3. Through empirical studies and field experiments of different auras and using biofeedback devices, paired with "clear-sighted potential" and therapeutic knowledge, more and more insight in the constitutional peculiarities and structures of the multidimensional human energy body were attained.
4. The development of the Aurastar 2000 technology was done in cooperation with the Ayurvedic Medical Doctors, the Aura-Seer Master Machine Builder Harald Markert, as well as several well-known electronic companies.

Technology

1. The Biopulsar-Reflexograph is based on the latest computer technology combined with the scientific basis of the reflex-zone and meridian teachings.
2. The hand sensor is a refined receiver for biomedical signals, which are taken from the reflex zones of the left hand's palm. The absorption of the signals is done by putting the hand on a set of gold plated sensor pegs furnished on an electronic circuit board. The sensors have an outstanding conducting capacity through the gold plating.
3. Only low frequency currents are used on the Biopulsar for the measurements of the skin resistance. Through this method it is guaranteed that during the measuring, the body cannot be inflicted with any harmful or disturbing impulses or manipulated by single probe point measuring systems.

The Sciences behind the Biopulsar Biofeedback System

1. Through the use of specialized electrodes, the Biopulsar-Reflexograph handplate sensors scan various parts of the body through the reflex zones in the hand.
2. The Biopulsar biofeedback technology monitors and measures physical states such as muscle tone, skin temperature, the amount of skin perspiration, brain wave activity and other physical conditions.
3. Response from the Biopulsar's system is a visual display of information gathered from the electrodes translated into graph and colour wavelength formats. This type of "feedback" provides the practitioner with a new, perceptible awareness of different body/mind processes, which extend beyond a human's "normal" five senses.
4. In short, the Biopulsar gives both the practitioner and her/his patient information about the patient's physiological functions that was previously unavailable to her/his conscious mind. Seeing one's own response patterns allow a patient to see her/himself from a "new" perspective and partake in improving her/his own condition.

Biopulsar technology incorporates several proven sciences such as biofeedback, neuroscience, reflexology, kinesiology, palmistry and body and colour languages to name a few, making it the most advanced bioenergetics technology in the world!

Features, Advantages & Benefits (FAB) Chart

Features	Advantages	Benefits
State of the Art Technology	No other alternate system technology in the market is as advanced in its capabilities.	Several years ahead of any other energy diagnostic system.
Over 140 Measuring Stations	Accuracy in ability to analyze full body analysis.	Repeatability of Vitality Measurements.
Indirect Meridian Testing	The only system on the market that measures 49 organs via the reflex zones.	Exclusive only to the Biopulsar.
Pure Pulse Diagnosis	Can be used by licensed professionals and therapists wanting a tool to analyze organ vitality levels.	Instant view of 50 organs (body parts) and their energy levels.
Reflex Zone Biofeedback of Complete Body via 50 Organs	Other systems give generalized reports on data read including possible symptoms, remedies and treatments; whereas, the Biopulsar can be used to gain deeper insight into the body and mind connection.	Ideal for: Remedy & Product Testing, Pulse Diagnosis (TMC, Ayurvedic, etc.), Aura and Mental as well as Holistic and Psychological Counselling, and Control Therapy to name a few applications.
Simultaneous Measuring of 50 Hand Reflex Zones in Real Time	All the sensors are measured at the same time and in real time (500ms) thereby reducing errors.	Ideal for accurate meridian & pulse diagnostics and in-depth biofeedback analysis.
Record and Replay Function	Documents all parameters read	Ability to record client's progress over a period of time.
Support Hotline	Staffed by an expert Doctor and Educator	Ask the energy specialist and a seasoned system user.
Portable	Operates from a laptop and fits into a carrying case.	Compact and easy to take anywhere!
Easy to Operate	Suitable for all levels of users.	Can be operated by staff.
Preventative Medicine	Help clients improve their energy weaknesses before they manifest into a physical symptoms.	Energy imbalances can be easily seen on the Biopulsar. Helps in preventing illness.
Simplistic	Operates in Windows format.	Immediate effective use.
Affordable	Less expensive than most other diagnostic and biofeedback systems.	Payback fast and easy.

The Biopulsar system reveals new dimensions of analysis creating the potential to prevent imbalances on a mental or physical level.

The intensive training program is a collaboration of research, experiences and includes training material.

Note:

- ◆ The Biopulsar-Reflexograph has over 140 measuring stations (no other aura technology has as many stations) and therefore uses Artificial Intelligence (AI) and complex bio data displays for achieving accurate organ vitality as well as aura and chakra measurements. This means each organ, aura and chakra percentage can be displayed to a vitality precision. The Biopulsar does not produce poor quality Polaroid photos nor enhance a picture's colours. The Biopulsar replicates one's aura according to the actual body's vitality!
- ◆ To our knowledge all other biofield systems are basing their so-called aura and chakra analysis on few measuring poles with little connection to the body. The Biopulsar relies on several measuring points to determine an organ's vitality reading, which means the accuracy of the body part is not influenced by the hand size. Rather the Biopulsar technology is based on reflex zones and many other proven scientific factors. (Read the Biopulsar's Introduction or Technology Development information for a more detailed description of the technology's development and capabilities.)
